

## NET FOR HELI-TRANSPORTATION

Net for suspension and transport of corpse and light loads by helicopter, with the possibility of hooking and retrieving by means of a winch or with the use of a barycentric hook.

The device is compressible to a small size for storage on board the helicopter and is easy to use, also thanks to the color-coded connection straps.

The load to be transported can be easily centered even when used on uneven ground, using the special reference positioned on the net.

Hanging kit (mod. Crux #845000001KK) included.

### Usage activities

HELIRESCUE

MOUNTAIN RESCUE
