GRIPREST ERGONOMIC

The GRIPREST ERGONOMIC handrest is designed for ERGONOMIC and NOMIC ice axes. Mounted on the handle and overmolded with a bi-material coating, it offers more efficient and comfortable support for the entire hand. The different positions allow adjustment to all hand sizes, as well as when wearing gloves. The absence of a steel point makes it safer and adapted for dry tooling.

Short Description Handrest for ERGONOMIC ice axe

- Selling Points**
- Efficient, comfortable support:
 - wide and comfortable shape offers three adjustment options (size S, M, and L), to adapt to all hands
 - overmolding and bi-material coating provide excellent grip
 - Lower part is without a steel point for better protection in the event the ice axe unhooks
 - Compatible only with ERGONOMIC (U022AA00) and NOMIC (U021AA00) ice axes

-
- Specification**
- Material(s): steel, glass fiber reinforced plastic
 - Weight: 35g
