

FAST-ACT® PRESSURIZED CYLINDERS

The **FAST-ACT® Pressurized Cylinder** is a fast-acting, rapid solution for decontamination and adsorption of toxic chemical vapors or liquids in an environment. The FAST-ACT® pressurized cylinder is available in 1kg, 2kg, and 4kg sizes.

FAST-ACT® can be safely applied where known or unknown chemicals are a potential threat.

Typical Applications:

- Hazmat Teams: air space decontamination
- Neutralization of acidic gases
- Emergency decontamination of gear
- Enclosed spaces knock down of vapors and/or odors
- Decontamination shelter/tent cleanup

Available in 3 different sizes

Weight and Dimensions vary with size

REF	PART NUMBER	NSN	CARTON DIMENSIONS	WEIGHT	CYLINDER DIAMETER
1KG	FA015-1000-00NS	4235-01-612-0947	393 x 159 x 117mm	2.4kg (5.3lbs)	108mm
2KG	FA015-2000-00NS	4235-01-612-0950	415 x 175 x 175mm	5.0kg (11lbs)	160mm
4KG	FA015-4000-00NS	4235-01-612-0969	529 x 177 x 177mm	7.7kg (17lbs)	160mm

HOW TO USE:

1

Remove safety pin.

2

Aim nozzle at hazard.

3

Squeeze handles.

VAPOR

For vapor hazard, spray FAST-ACT® powder into air in direction of hazard.

LIQUID

For liquid hazard, spray on spill to ensure complete coverage of hazard.

- **Minimal Training Required** All units are ready-to-use, no premixing or preparation.
- **Fast** Immediately neutralizes, adsorbs or contains on contact
- **Safe** Non-toxic, non-corrosive, non-flammable, environmentally friendly
