PUR'DRY

Designed for NOMIC and ERGONOMIC ice axes, the PUR'DRY pick is exclusively for dry tooling. The thickness of the pick, 4 mm along its entire length, makes it much stronger when torqued. The shape of the teeth on the lower part provides efficient hooking and improves the stability of the ice axe when switching hands. It also has hooking teeth on the upper part, for inverted use or for slotting the pick in cracks.

Short Description Pick exclusively designed for dry tooling, for NOMIC and ERGONOMIC ice axes

Selling Points

- Exclusively designed for dry tooling:
